

# DETAILED VIVA PREPARATION GUIDE

## Seminar Overview

My seminar is on Blockchain Adoption Among Social Media Influencers. Blockchain is a decentralized and secure digital ledger. Influencers help spread awareness and adoption due to their audience reach.

## Key Concepts

Blockchain ensures transparency, immutability, and security. It is used in cryptocurrency, NFTs, and verification systems.

## TAM Model

Technology Acceptance Model includes Perceived Usefulness and Perceived Ease of Use, which influence adoption.

## TRI Model

Technology Readiness Index includes optimism, innovativeness, discomfort, and insecurity.

## Findings

Optimism and innovativeness positively influence adoption, while discomfort and insecurity have minimal impact.

## Applications

Content verification, NFTs, smart contracts, digital ownership, and transparent advertising.

## **Project Overview**

Employee Management System is a web-based platform to manage employee data, attendance, salary, and feedback efficiently.

## **Modules**

Authentication, Employee Management, Attendance, Salary Management, Feedback System.

## **Technologies**

Frontend: HTML, CSS, JavaScript, Bootstrap. Backend: PHP. Database: MySQL.

## **Architecture**

Three-tier architecture: Presentation layer, Application layer, and Data layer.

## **Database**

Includes tables for Users, Attendance, Salary, Feedback, Applications.

## **Security**

Password hashing using bcrypt, SQL injection prevention, session management, role-based access control.

## **Results**

Fast data retrieval, accurate attendance processing, performance-based salary system, supports multiple users.

## **Advantages**

Automation, efficiency, transparency, reduced manual errors.

## **Limitations**

Basic implementation, local deployment, limited scalability.

## **Future Scope**

Cloud deployment, mobile application, AI integration, biometric attendance.

## **Common Viva Questions**

1. What is Blockchain? 2. What is TAM? 3. What is EMS? 4. What is CRUD? 5. What is SQL Injection? 6. What is ER Diagram? 7. What is DFD? 8. What is Role-based access?

## **Tips**

Speak confidently, give clear answers, relate concepts to real-world applications, and stay calm.
